

Steizer electric

The world's largest technical professional organization dedicated to advancing technology for the benefit of humanity is the Institute of Electrical and Electronics Engineers, IEEE.

Founded in 1963 it now has over 460,000 members and a revenue of \$584 million. The website iee.org

The IEEE 519 Standards are not being met by the Wind/Solar generation operators. Utilities need to update their out dated distribution systems to meet today's technological loads.

As currently designed and implemented solar cannot comply with the applicable standards, and are unsafe for human and animal health.

Solar takes away our food security.

We are in a Global Food Crisis
Minnesota is on track to lose about
480,000 acres of farm land by
2040, 300,000 to solar fields.

Source-NPR Radio

All things considered

It's hard to be losing our farm
land; farms produce our food.
This will be a problem for human
health.

Springdale Farms produce food
for over 700 families on 35 acres.
Old Plank Farm produces food for
400 families on 15 acres.

These are just 2 examples in our
area of the amount of food that
can be produced in areas the
size of these solar fields.

We ask you to deny these
solar projects.

Our Story

For more than two decades, Dave Stetzer has focused on troubleshooting power quality problems, specifically the problem of dirty electricity (electrical pollution, “stray voltage”), in the United States and in numerous countries throughout the world. His work in this area led to the development of the STETZERiZER® Filter, the world’s first power line EM (electromagnetic) filter.

Along with the late Professor Martin Graham, Dave also developed the STETZERiZER® Microsurge Meter. The only meter of its kind, the STETZERiZER® Microsurge Meter is the gold standard in dirty electricity measurement. Both STETZERiZER® Filters and the STETZERiZER® Microsurge Meter were designed from the ground up to be the easiest, most effective tools the average person can use to eliminate dirty electricity from their home, workplace, or other electrified environment.

STETZERiZER® Filter

Buy Now

The STETZERiZER® Filter is based upon 100 year-old science and power engineering principles. Newly introduced is the design, which is focused on the needs of the customers in homes, offices, schools, etc. Filters have been extensively applied for decades by industrial users and the electric utility industry itself.

STETZERiZER®

Microsurge Meter

Buy Now

The STETZERiZER® Microsurge Meter by Graham-Stetzer is designed to separate the power line frequency to detect and respond to low level high frequency voltages caused by transients and harmonics on power lines. The level of these voltages is measured in GS (Graham-Stetzer) units and will vary with electrical equipment and loads.

rFOIL® Electromagnetic Shielding

The banner features the IEEE STEM Summit logo at the top left, which includes a stylized mountain graphic. To the right is a circular inset image showing the backs of four volunteers wearing white hard hats and blue t-shirts with a cartoon robot logo and the text '#Team Volunteer'. Below the logo, the dates '23-25 October 2024' are displayed with a location pin icon. The main text reads 'Join us to explore new ways to spark school-aged children's interest in STEM!'. A prominent red 'REGISTER' button is located below the text. The IEEE logo is in the bottom right corner. A decorative blue line with circular endpoints connects the 'REGISTER' button to the IEEE logo.
